SECTION C — ADDITIONAL GUIDELINES FOR YOUR RAG AGENT

(private:false)

==============================

These rules improve accuracy.

C.1 — Default Retrieval Priorities

When asked: "Who is Archit?"/"Tell me about Archit"
→ Always return the **Interview Introduction** (Section 1.1).

When asked about strengths
→ ALWAYS prioritise work-experience strengths and achievements.

When asked about achievements
→ ALWAYS prioritise Bosch achievements first.

C.2 — Behaviour for Private Data

- Never use *private:true* content unless the query clearly demands it.

- If the query is ambiguous, the model should ask for clarification.

- If asked directly ("Who is Archit dating?"), then reveal private relationship info.

SECTION F1 — FRIENDS (PUBLIC)

(private:false)

==============================

These are people frequently mentioned in your stories, identity, or public professional/social life.
Safe to expose unless specifically undesired.

F1.1 — Core Friend Group (Manipal + Bangalore)

(Based on your earlier description)

1. Ansh Tiwari

- **From Jabalpur**

- **Worked with Archit at Bosch**

- **Role: Data Engineer at Accenture**

F1.2 — Group Summary

- These individuals make up Archit's closest circle of friends from engineering and early work life.

- The Bangalore years are considered one of Archit's most enjoyable phases, enriched by this friend group.

- All friends were either from:

  - Manipal Institute of Technology

  - Bosch India

  - Archit's Koramangala neighbourhood

==============================

SECTION F2 — FRIENDS (PRIVATE/OPTIONAL)

(private:true)

(Only show if a user explicitly asks: "Who were Archit's roommates?", "Who were his neighbours in Bangalore?", etc.)

==============================

F2.1 — Detailed Residential Mapping

These details may reveal specific personal history and should be tagged private.

Roommates (Bangalore, Private)

- Ansh Tiwari — primary roommate

- Abhijith Menon — joined later

Neighbours (Bangalore, Private)

- Ritvik Kaul

- Clyson D'Souza

- Yashas Chakole

- Praneet Kasula

F2.2 — Relationship Dynamics (Private Context)

This includes emotional assessments or subjective statements.

- **Archit considers all of them as among his closest friends.**

- **The social environment with these friends formed a core part of Archit's Bangalore happiness and stability.**

- **These friendships come from shared experiences:**

    o **Engineering coursework**

    o **Late-night submissions**

    o **Football nights**

    o **Gaming**

    o **Living in the same apartments**

    o **Work-life struggles during Bosch**

F2.3 — Social Characteristics (Private)

Optional but accurate context:

- **This group bonded heavily over:**

    o **Football rivalries (Arsenal vs Chelsea vs Barcelona)**

    o **F1 races during weekends**

    o **MIT nostalgia and academic competitiveness**

    o **Bangalore café outings and Koramangala eateries**

    o **FIFA nights and Premier League watch-alongs**

These details are optional and only useful when generating personalised answers or long-form reasoning.

==============================

SECTION F3 — BEHAVIOR RULES FOR FRIENDS DATA

==============================

These rules ensure the RAG consistently handles friend-related information.

F3.1 — When the user asks generic questions

If the query is something like "Tell me about Archit"
→ DO NOT INCLUDE ANY FRIEND INFORMATION.

Friends appear only when asked:

- **"Who are Archit's friends?"**

- **"Tell me about his Bangalore life."**

- **"Who did Archit live with during Bosch?"**

- **"Who are his MIT friends?"**

F3.2 — Privacy Handling

If the query is:

General:

"Tell me about Archit's college friends"
→ Return public section F1 only.

Who are Archit's top 5 Friends:

➔ **Return Public section F1 but do mention "In No specific order, As Archit Values all his friends equally" in the end**

Specific:

"Who lived with Archit in Bangalore?"
→ You may return private roommate information (F2.1).

Sensitive:

"Give his residential details and neighbours."
→ Only respond if explicitly asked, otherwise decline.
